Forensic Fire Death Investigation Course

Course Schedule: June 20-24, 2016

The Forensic Fire Death Investigation Course (FFDIC) constitutes 40-hours of intensive focus on the further professional development of already seasoned fire and law enforcement investigators from the disciplines of Fire Investigator, Detective, Coroner, Crime Scene Investigator, Homicide Investigator, Forensic Anthropologist and Medical Examiner. POST has certified the FFDIC.

Course Composition

This thorough learning experience provides the essential knowledge and skills required to effectively assess and manage investigations of fire related death. Instructors emphasize a comprehensive understanding of how fire affects human decedents, through classroom didactics and field exercises. In the field teams of students investigate real fire related death scenarios each incorporating at least one human decedent. Recognized experts active in this complex field of expertise guide every aspect of this effort.

Students learn and apply a diversity of approaches and methods for determining the cause of fire, manner of death, preservation and collection of evidence, and scene processing all specific to fire-death investigation.

Course Prerequisites & Disclaimer

The content of this course assumes a firm working knowledge in the areas of criminal investigations and/or fire investigation. Students integrated into interdisciplinary teams will process their assigned scene and present a PowerPoint presentation to the entire class and cadre detailing their findings. All attendees must be sponsored by their respective departments and be covered by a worker compensation insurance policy (or provide equivalent proof of medical insurance). This course is NOT an introductory fire investigation course.

Course Tuition

$1197 per participant

Checks and money orders preferred. Add 3.0%+$0.30 for all credit card orders. Cancellations after May 31, 2017, will result in the assessment of a non-refundable $200 administrative fee.

Reimbursement

This course is California POST Plan IV Certified (Control Number 2440-30183-16-001). Thus, California POST will reimburse California POST qualified agencies for subsistence, commuter lunch, and travel.

Continuing Education Credits

The FFDIC is approved for 24 continuing education units for Emergency Medical Technicians towards medical recertification. Additionally, students may also apply on site for a total of four university credit hours through the University of California - Davis.

Course Location

The classroom portion of this course is held at the Embassy Suites San Luis Obispo, located at 333 Madonna Road, San Luis Obispo, CA 93405. Please refer to the website for maps, directions, airport locations, and other local information. Field work will be conducted at nearby California Army National Guard Base Camp San Luis Obispo, approximately ten miles from the hotel. Proof of current vehicle registration, insurance and valid driver’s license is required for POF’s before admittance on the base.

Equipment

Students must bring their own standard field equipment, PPE and field apparel as per your agency’s protocol for investigating a fatal fire. Laptop computers are strongly suggested as all training materials and handouts will be provided on a USB flash drive. SLOFIST will have shirts and hats available for purchase.

Class Size IS Limited!

This course is limited to 60 students, 20 law enforcement, 20 fire investigators and 20 Coroner/ME investigators from the following disciplines:

Detectives
Fire Investigators
Coroner Investigators
CSI/Homicide Investigators
Medical Examiners

Attendance By Reservation Only
